

Dear sirs,As this topic was recently brought to my attention, my response is swift.

Please reject NAB's petition 04-160 !!!!!

In a broad sense, I disagree with almost all FCC intervention in the marketplace, for example, FCC's actions toward Howard Stern. But in this very specific case, I disagree with this petition that would limit or eliminate these xm stations. Many a time, I have avoided traffic and weather problems solely because I am able to get such info immediately because I am an xm subscriber. Which is the reason I went to pay services in the first place, a true alternative. You get what you pay for and in this case the money is well spent.
